

FOR PERFORMANCE, VERSATILITY & PRICE, YOU CAN'T BEAT

Gates Multi Purpose Hose

IN STOCK AT RYDELL BRANCHES AROUND AUSTRALIA

Terminator®

RECOMMENDED FOR

The toughest industrial applications. Air, oil, water, high pressure, abrasive environments and some chemical applications. Excellent durability and kink resistance for extra long life. Meets USMSHA 30 CFR 18.65 Flame Resistance. Non-conductive at 1,000 volts.

Premo Flex®

RECOMMENDED FOR

Air, water, petroleum oils, petrol, kerosene and fuel oil (to 49°C) and lubricating oils. Excellent weather and ozone resistance. The most versatile Gates hose. Suited to over 50 different applications. Non-conductive at 1,000 volts D.C. Beats Ortac® MPT® Versicon®.

Adapta Flex™

RECOMMENDED FOR

Air and water applications requiring maximum flexibility. Outstanding resistance to heat and ozone, plus good cover resistance to vegetable oils.

Gates Industrial Micro-V Belts

(J, L & M SERIES)

Specially designed to replace original equipment belts on extra heavy applications such as machine tools, compressors, pumping equipment and other industrial equipment requiring vee-ribbed belts. Floor polishers, sanders, lathes, wood working machines, grinders, textile machinery, exercise/gym equipment, food machinery. Rydell stock Gates Micro-V belts in bulk and can cut to any number of ribs. We can also supply custom made haul-off belts and cable pulling belts using Micro-V.

High quality machines perform better with high quality belts – That's why Rydell stock Gates Micro-V

- Exclusive Gates truncated belt design offers up to 80% higher horsepower capacity than industry standards. Longer belt life means more productive machines.
- Increased Flexibility, reduces heat build-up and belt cracking on high speeds and smaller diameter pulleys. Gates Micro-V belts are found on original equipment.
- Highly resistant to oil, heat and other adverse conditions.
- Less sensitive to debris in sheave/pulley grooves.
- Meets or exceeds RMA industry standards for static conductivity.

Product type 9171, 9173 and 9174.

- Energy efficient
- Runs cooler than conventional belts
- High power density.
