

Rydell

Rydell Industrial (Belting) Co

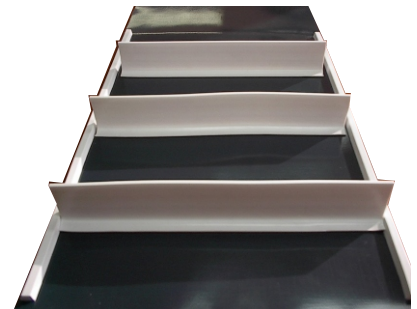

Rycon Cleats and Profiles

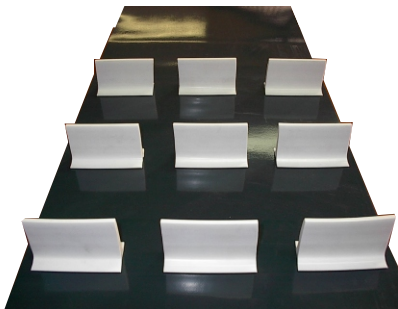

Longitudinal Profile top side suitable for product containment and can also be used as a tracking aid with top rollers

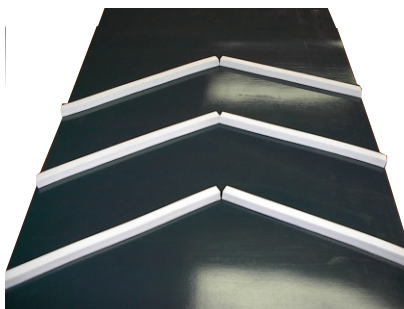

Longitudinal profile top side with cross cleats for incline applications and can also be used to transport without vibration on return rollers.

Longitudinal profile top side with cross cleats for high volume incline conveying and gooseneck conveyors where hold down rollers are utilised.

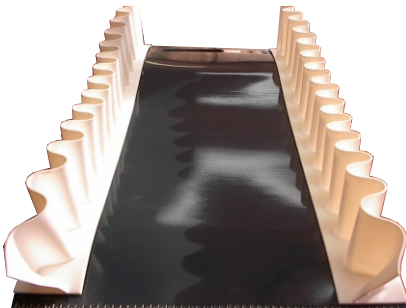

Cross cleats with cut-out sections for support on the return with rollers

Herringbone profiles top side for product conveying and support on return rollers

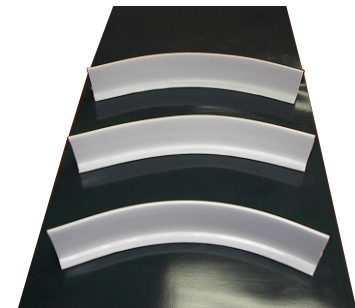

Longitudinal profile centre underside for side loading applications to maintain positive belt tracking and alignment.

Flexible Borderflex Sidewalling for high product containment with flexibility around head and tail rollers

Bubblecleat particularly suitable for delicate products where traditional cleats can bruise or damage the items to be conveyed.

Curve Cleats for centralisation of transported product and juice up incline applications
