

Rydell Industrial (Belting) Co

It pays to invest in Quality

Rycon Weldable Round & Vee Belts

Rydell offers a huge selection of cords and profiles to suit any application

Rycon Black Max splicing kit suited to splicing thermoweldable cords

Rydell Industrial (Belting) Co introduce our range of thermoweldable extruded belts.

Rycon Thermoweldable Belts are used extensively for the transportation of tiles and bricks, where a hard wearing easily splice belt is required. These belts are available in round sections from 3 mm up to 15mm, reinforced and unreinforced, in different hardnesses to suit the application.

They are also available in Vee sections 10 x 6mm (V10 or A section) up to 22 x 18mm (V22 or C section), with ridge top or rough top coatings, reinforced or unreinforced.

These belts are generally pre-tensioned on installation, unreinforced max 8%, aramid reinforced <1%.
Operating temperatures -20 to +50C

Main Features

- Easy and Fast Splicing
- Superior resistance to abrasion
- Resistant to oils and grease
- High tensile strength
- Absorbs vibration and shock loads
- Easily cleaned and stored
- Wide selection of profiles and hardnesses
