

## Food grade PU-SAFE Curve Retaining Rings

*Inferior rings can stretch, break and fall off into the frame or worse...  
.....into your product*

Our PU-SAFE Curve Retaining Rings are used on curve conveyor belts to connect the lugs on the belt to the sidebow chain on the outside radius of the bend.

Our PU-SAFE rings are manufactured in a high resiliency FDA grade PU giving them a long service life and our special joining process makes them virtually unbreakable. Our lubricated polytube cover extends their lifespan further, and ensures a neat fit around the curve lug and attachment on the chain, to reduce the likelihood of rings coming off..

Best of all our components are food grade, Many loops currently employed in this application are not food grade, and commonly break, fall off and present a substantial contamination risk.

- Available in several sizes to suit your curve
- Super Strong welds are virtually unbreakable
- Sleeve give tight fit to reduce rings coming off
- Increased food safety to protect contamination
