

## Rycon “Do-it-yourself” belting

Rappcord round Urethane belts are used extensively for light transportation on printing and folding machines, newspaper conveying, packing machines, canneries, wood, paper and cardboard processing, food and allied industries.

Rappcord is joined quickly and easily with our Black Max splicing kit. It is available in a variety of shapes and constructions

Redthane or Quik-Go belting is designed for fast belt replacement where no tools or welding equipment is required. It is a hollow, round polyurethane belt which is joined with an aluminium barb.

It is ideal for packaging or conveying lines of light duty product, paper and cardboard conveying and general duties across a wide variety of industries.

NuTLink belts are made from a polyester / polyurethane composite which ensures long life under the most arduous conditions, up to twenty times longer compared to similar rubber based belting. It is made of a series of links which can be spliced at any length suitable for the application. The link construction means that belts can be fitted quickly directly onto the pulley without costly downtime.

Varilength Belting is a tough open length Vee Belt, that can be cut to a specific length and then fastened with a clamping plate to provide a quick and economical belt replacement. It is available in rolls of all common sizes, and clamps can be purchased individually.
