## Rydell Industrial (Belting) Co

### Rycon Rod Network Wire Belting

Rycon Rod Network belts are used in a variety of industries including enrobing, cooling, drying, frying, packaging, heating and cleaning. Manufactured from high quality music wire or 1.43 stainless steel, our belts are used in many major factories around the world for their advantages, including precise maintenance free belt run, high quality and long service life.

Used by many major OEM's as original equipment fitment, Rycon Rod Network belts are positively driven by machined toothed sprockets and grooved transfer rollers.

The open construction of our belts permit the free flow of liquid media or hot or cold air due to the open nature of the belt construction.

Please ask for a detail flyer outlining all the types and sizes available from your nearest Rydell branch.
